SUMMARY

UI/UX Designer with 2+ years of experience creating intuitive, user-focused digital products. Skilled in research, wireframing, prototyping, and visual design, with experience at Genpact and TAMU Infotech delivering functional and visually engaging design solutions.

WORK EXPERIENCE

Tamu Infotech

Aug 2024 - present

At TAMU Infotech, I design user-centered digital products for diverse clients, focusing on both functionality and aesthetics. I collaborate with cross-functional teams to create wireframes, prototypes, and responsive interfaces that elevate user engagement and align with business goals.

Genpact

Jul 2023 - Aug 2024

At Genpact, I designed intuitive and data-driven interfaces that enhanced user experiences across multiple digital platforms. My role involved translating user research insights into clear, actionable design solutions, ensuring smooth design-to-development handoffs and consistent user flows.

PROJECTS

Mudfield - Organic Food Brand Website [UI/UX Design]

[Live Link](#)

- Designed a clean, user-friendly website for an organic food brand with a focus on natural aesthetics and intuitive navigation.
- Created wireframes, prototypes, and responsive layouts in Figma to enhance usability and brand storytelling.
- Collaborated with the marketing team to align design with brand goals and improve customer engagement.

ERP Web Application – Business Management Platform [UI/UX Design]

[Live Link](#)

- Designed an end-to-end ERP platform to streamline core business operations such as HR, sales, inventory, and finance.
- Created user flows, wireframes, and interactive prototypes in Figma to simplify complex workflows and improve usability.
- Developed role-based dashboards and intuitive navigation to enhance data accessibility and decision-making.
- Collaborated with cross-functional teams to align design with business goals and improve operational efficiency.

Matrimony Mobile Application – Matchmaking Platform [UI/UX Design]

- Designed a modern, user-friendly matrimony platform to simplify profile creation and partner search.
- Created wireframes, prototypes, and responsive layouts in Figma to enhance usability and engagement.
- Focused on clear navigation, smart filtering, and personalized matchmaking for an improved user experience.

AMS Web Application– Athletic Management System [UI/UX Design]

[Live Link](#)

- Designed a comprehensive web application for assessing and managing player fitness, performance, and health data across multiple roles including Admin, Coach, Player, and Assessor.
- Created wireframes, prototypes, and interactive dashboards in Figma to visualize test results such as nutrition, cardio, cognitive, and injury prevention analysis.
- Simplified complex data workflows and improved user experience through structured layouts and intuitive navigation.
- Collaborated with developers and domain experts to ensure accurate data representation and seamless role-based functionality.

SKILLS
